PROFILE SUMMARY

3D Artist & Technical Artist with a Computer Science background, specializing in game-ready asset creation and real-time engine integration. Experienced in modeling hard-surface props, environments, and character assets in Blender, with clean topology and optimized UV layouts. Combines artistic vision with CS fundamentals in Python, Java, and graphics pipelines to bridge asset design and seamless game engine execution in Unity and Unreal Engine.

TECHNICAL SKILLS & COMPETENCIES

3D Asset Creation	Blender (Hard-Surface, Props, Weapons, Environment & Character Anatomy), UV Unwrapping, Retopology
Game Engines & Pipeline	Unity, Unreal Engine (Asset Import, Material Setup, Scene Lighting, LOD Creation, Real-Time Optimization)
Software & Logic	Python & Java (Data Structures & OOP Fundamentals), C, HTML/CSS/JavaScript, Git/GitHub Version Control
Core Strengths	Engine Budgeting, Optimization, Technical Problem-Solving, Technical Documentation, Adaptability

PORTFOLIO & INTERACTIVE ENGINE DEMOS

Online 3D Art Portfolio & Showcase Site — 2025

- Designed and launched a personal portfolio website presenting high-poly to low-poly asset workflows, wireframe viewports, and texture maps.
- Integrated web 3D previews to enable interactive asset inspection directly inside web browsers.

Real-Time Engine Tech Demos (Unity & Unreal Engine) — 2025

- **Environment & Lighting Demo:** Built a fully playable mini-scene in Unreal Engine demonstrating dynamic lighting, custom shaders, and optimized collision meshes.
- **Weapon Inspection & Physics Demo:** Created a Unity showcase featuring weapon asset assembly, custom inspect animations, and performance profiling to maintain 60+ FPS.

3D ART & GAME DEVELOPMENT PROJECTS

Crashvore — Game Project — 2025

- Modeled and textured 3D game assets in Blender, ensuring stylized visual cohesion across props and environments.
- Imported and calibrated assets in engine, establishing clean collision bounds and optimizing polycount for real-time performance.

Weapon & Character Asset Pack — 2025

- Crafted modular 3D weapon models with game-ready edge flow and detailed sub-surface details.
- Sculpted and retopologized stylized character body parts, focusing on deformation-friendly topology and efficient UV space.

Forensic Lab — Academic 3D Environment — 2025

- Constructed an architectural forensic laboratory environment in Blender with high spatial accuracy and accurate scale metrics.

EDUCATION & ACADEMIC BACKGROUND

B.Tech in Computer Science and Engineering — 2023 – 2027

Centurion University of Technology and Management, Vizianagaram

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming (Java/Python), Computer Graphics, Software
